

COMMERCIAL OFFER

We, at StartICO.net, offer to purchase our unique and professional software for organizing the coin/token sale for initiators of ICO projects. At present time this is the most functional and protected software on the market for working with Cryptocurrencies and Fiat money, blockchain solutions and smart contracts.

Demo version: <http://demo.startico.net/>

Login: demo@exapmle.com

Password: 123123aA!

The software has the following features and characteristics:

General functionality of our software:

- Integration with the Ethereum and/or Waves blockchain platform with automatic delivery of the token to investor upon receipt of the investor's payment;
- Acceptance of payments with BTC, ETH, EUR, USD, (optional: Visa / MC, plus other Cryptocurrencies);
- Easy integration into the ICO project website by inserting a special script into the html-code of the page;
- Retuning statistics of token sales and funds rised on site page from database;
- Subscribing users to the project's news before the ICO starts;
- Support for 6 interface languages (English, Chinese, Russian, Spanish, German, Japanese). Adding additional languages is possible upon individual request.
- Referral links;

Personal account of ICO's initiator:

- Setting up bonuses for early investors with breakdown by dates and terms of validity;
- Verification of the identity of investors. A disabling option available (if investor's identity is not verified, payments are accepted, but the token is not delivered);
- Loading Bitcoin and Ethereum wallet addresses, as well as bank details for receiving payment;
- Function of manual payment order confirmation (in addition to automatic);
- Editable "Help" section on all languages in HTML format;
- Insert a news widget (for example, from Twitter);
- Inserting metrics code;
- Editable disclaimer in HTML-format;
- Display of token sales statistics;
- Two-factor identification at the entrance to the personal account (plug-in function at the request of the user);
- The function of loading Waves private key, Ethereum smart contract and other sensitive data in an encrypted or compiled form;
- Setting the price of token in USD, EUR or other variable price linked with some asset cost (oil, gold ect.);
- Payback of token option from token holder via smart contract with variable price set in settings.

Personal account for investors into ICO:

- Our software receives investor's payments and provides to investor automatic tracking of the payment, as well as automatic delivery of the token to investor;
- Our software provides to investor an opportunity to change the address of Waves and/or Ethereum wallet to where the purchased token will be delivered;
- Recalculating amount of tokens according sum of received payment if it differs from sum of order;
- Payback of token option to token issuer via smart contract with variable price;
- The "News" section;
- The "Help" section;
- Output of investment statistics and order list;
- Output of investors wallet token balance and last 10 transactions from blockchain;
- Contact form with sending messages to the ICO support;
- Two-factor identification at the entrance to the personal account (plug-in function at the request of the user).

Main advantages of our software:

- Full control of the cryptocurrencies/funds collected during the token sale. Cryptocurrencies/funds are sent directly to the wallets and accounts of the investor (or escrow agent);
- Our software provides maximum reliability and security of payment acceptance. Software does not store private keys for wallets and hacking the software does not make sense;
- Inability to change payment addresses and details, each transaction is one-time;
- Easy and fast integration into any website/landing page.
